What were the fund costs for the last year? (based on a hypothetical \$10,000 investment)

	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Avantis International Small Cap Value ETF	\$41	0.36%

What were the key factors that affected the fund's performance?

Avantis International Small Cap Value ETF returned 29.11% for the reporting period ended August 31, 2025. The fund seeks long-term capital appreciation. The commentary below refers to the fund's performance compared to the MSCI World ex USA Small Cap Index.

- Non-U.S. developed markets stocks rallied for the 12-month period, which was characterized by slow global growth and upbeat corporate earnings results. Stocks advanced despite tariff policy uncertainty, interest rate volatility, geopolitical tensions and persistent inflation. Small-cap stocks generally outperformed large caps, and within the small-cap universe, value outpaced growth.
- The fund's emphasis on companies with the highest profitability and book-to-market characteristics, which outperformed, was a key contributor to performance. An underweight position versus the index in companies with the lowest profitability and book-to-market traits, which underperformed, also aided results.
- Additionally, excluding real estate investment trusts (REITs), which is a strategic rather than tactical decision, lifted results. REITs underperformed for the period.
- Overall, sector allocations, a byproduct of the fund's focus on companies with high profitability and book-to-market characteristics, also contributed. Overweight positions in the financials and materials sectors, which sharply outperformed, were top contributors.
