NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

STATEMENT OF MANAGER'S RESPONSIBILITIES

The Manager is responsible for preparing the annual report and the financial statements of each Sub-Fund of Northern Trust UCITS Common Contractual Fund (the "CCF"), in accordance with applicable law and regulations.

Irish law requires the Manager of the Sub-Funds to prepare financial statements for each financial year. The Manager has elected to prepare the financial statements in accordance with Generally Accepted Accounting Practice in Ireland, comprising applicable law and FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements are required to give a true and fair view of the assets, liabilities and financial position of the Sub-Funds and of their changes in net assets attributable to holders of redeemable participating units for that period. In preparing these financial statements, the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Sub-Funds or to cease operations, or have no realistic alternative but to do so.

The Manager is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Sub-Funds and enable it to ensure that the financial statements are prepared in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Sub-Funds. In this regard, they have entrusted the assets of the Sub-Funds to a trustee for safe-keeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities.

The Manager is responsible for the maintenance and integrity of the financial information included on the Sub-Funds' website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

On behalf of the Manager

Signed by:

Director 591593A6B8DC464...
Claire Cawley

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

DEPOSITARY'S REPORT TO UNITHOLDERS

We, Northern Trust Fiduciary Services (Ireland) Limited, appointed Depositary to Northern Trust UCITS Common Contractual Fund (the "CCF") provide this report solely in favour of the unitholders of the CCF for the year ended 31 December 2024 (the "Annual Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011), as amended, Directive 2009/65/EU which implemented into Irish Law (the "Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Manager for the Annual Accounting Period and we hereby report thereon to the unitholders of the CCF as follows;

We are of the opinion that the CCF has been managed during the Annual Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager by the constitutional documents and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

For and on behalf of:

Northern Trust Fiduciary Services (Ireland) Limited

INVESTMENT REVIEW

For the year ended 31 December 2024

Launch Date

10 November 2010

Sub-Fund Size

US\$1.11 billion

Benchmark

MSCI World Index

Sub-Fund Review

Since inception, the Sub-Fund has outperformed the benchmark index by 27 bps p.a. and returned 10.67%* p.a. while the benchmark has returned 10.40% p.a. For the year ended 31 December 2024, the Sub-Fund outperformed the benchmark index by 13 bps and returned 18.80%* against a benchmark return of 18.67%. The ex-post tracking error since inception is 0.07% and for 1 year is 0.03%. For the year ended 31 December 2024, the Sub-Fund experienced net outflows of US\$5.88 million. For the year under review, the Sub-Fund has tracked its benchmark index within its anticipated tracking error.

MSCI implemented changes to their series of indices end of February 2024. For MSCI World, there were 7 additions to and 20 deletions from the index. One-way index turnover was 0.60%.

MSCI implemented changes to their series of indices end of May 2024. For MSCI World, there were 5 additions to and 24 deletions from the index. One-way index turnover was 0.71%.

MSCI implemented changes to their series of indices end of August 2024. For MSCI World, there were 10 additions to and 45 deletions from the index. One-way index turnover was 0.49%.

MSCI implemented changes to their series of indices end of November 2024. For MSCI World, there were 10 additions to and 21 deletions from the index. One-way index turnover was 0.57%.

The index changes were carefully traded to minimise cost and deviation from the benchmark and were used as an opportunity to equitise some of the futures exposure.

*Performance shown is at Sub-Fund level and gross of all fees and expenses.

Sustainable Finance Disclosure Regulation (“SFDR”)

Northern Trust World Equity Index Fund is classified as an Article 6 fund under EU Sustainable Finance Disclosure Regulation and does not have as its objective sustainable investment, nor does it promote environmental and/or social characteristics. As a result, the Sub-Fund does not fall within scope of sustainability-related disclosure rules set out in Article 8 or 9 of SFDR.

INVESTMENT REVIEW

For the year ended 31 December 2024

Launch Date

13 November 2018

Sub-Fund Size

€0.01 billion

Reference Index

MSCI Europe Index

Sub-Fund Review

Since inception, the Sub-Fund has outperformed the reference index by 15 bps p.a. and returned 8.24%* p.a. while the reference index has returned 8.09% p.a. For the year ended 31 December 2024, the Sub-Fund underperformed the reference index by 88 bps and returned 7.71%* against a reference index return of 8.59%. The ex-post tracking error since inception is 1.77% and for 1 year is 1.01%. For the year ended 31 December 2024, the Sub-Fund experienced net outflows of €11.73 million.

The European market finished 2024 solidly higher. Better than expected economic data and improving inflation figures gave support to the market. The improvement in inflation data allowed the European Central Bank ("ECB") to begin lowering short term interest rates, further boosting investor confidence. Financials and Communication Services were the best performing segments of the market. Energy and Materials sectors were the worst performing sectors as commodity prices decreased for much of the year.

During the year, the Sub-Fund underperformed the MSCI Europe reference index. By design, country and currency allocation had a minimal effect on relative performance. High Value (inexpensive) names slightly outperformed Low Value (expensive) names during the year. Overall allocation effect from Value added to performance. Within value, exposure to higher quality stocks slightly detracted from performance, while exposure to high momentum stocks added to performance. ESG exposure detracted from relative returns. Stock selection added to performance in the Financials and Communication Services sectors. Stock selection detracted from performance in the Industrials and Materials sectors.

*Performance shown is at Sub-Fund level and gross of all fees and expenses.

Sub-Fund Review

Since inception, the Sub-Fund has outperformed the benchmark index by 91 bps p.a. and returned 2.67%* p.a. while the benchmark has returned 1.76% p.a. For the year ended 31 December 2024, the Sub-Fund outperformed the benchmark index by 90 bps and returned 1.84%* against a benchmark return of 0.94%. The ex-post tracking error since inception is 0.17% and for 1 year is 0.16%. For the year ended 31 December 2024, the Sub-Fund experienced net outflows of US\$94.94 million. For the year under review, the Sub-Fund has tracked its benchmark index within its anticipated tracking error.

The start of the year 2024 was full of uncertainties in the markets with a fear of recession on the U.S. economy, ongoing conflict between Russia and Ukraine, tension in China - Taiwan and the key political U.S. Presidential elections scheduled for the fourth quarter of 2024. The data from the U.S. Bureau of Labor Statistics ("BLS"), such as inflation and unemployment were key indicators on the stance taken by the U.S. Federal Reserve ("Fed"). Inflation statistics were above the Fed's target range of around 2.00% and any signs of economic cool down were key indicators on the interest rate changes. The year on year inflation was 2.90% for December 2024, which is still above the Fed's target range of 2.00%. On the employment statistic, 2.23 million jobs have been created in the final year of the Biden Administration, highlighting a significant decline since 3 million jobs were created in 2023. However, the rate of unemployment has been slower at 4.10% in December 2024 giving a positive signal to the resilient economy. Also, there has been a reduction in job loss and the duration of unemployment. The U.S. and the global markets have been keeping an eye out for the interest rates decision by the Fed under Jerome Powell. During the initial two quarters of the year the rates had been kept on hold between 5.25% to 5.50% after a series of hikes from 2020. However, the Fed made a rate cut in September 2024 which was followed by subsequent rate cuts twice in the fourth quarter of the year. The current range for interest rates at the end of 2024 is between 4.25% to 4.50%. Further decision on the trajectory of the interest rates would be made in January 2025. As currently, the U.S. debt ceiling is at US\$36.10 trillion which is expected to be breached in January 2025 as per the treasury secretary Janet Yellen. The victory in the U.S. presidential elections has paved a way for the Republican Candidate Donald Trump to the White House in the fourth quarter of 2024. The U.S. trade outlook with Mexico, China and other countries would be uncertain depending on the tariffs/sanctions being imposed by the new government.

The U.S. economy has been growing at a higher pace since reporting a growth rate of 1.60% in the first quarter of 2024 to a growth rate of 3.10% in the third quarter of 2024. The increase in the disposable personal income was US\$61.10 billion while the personal consumption expenditure increased to US\$81.30 billion in the month of November 2024. The international transactions highlighted an increase in current account deficit by US\$35.90 billion dollars for the third quarter of 2024. The automobile production is around 10.40 million units alone for the month of December which denotes a minimal change when compared with 10.16 million units produced in January. There has been a reduction in the exports of automobile units to around 57,000 units in the month of October when compared to September. The manufacturing sector showed a minor growth where the U.S. Institute for Supply Management ("ISM") manufacturing index was at 49.30 in December showing some optimism for this sector when compared to 48.40 being reported in November. Also, the ISM U.S. services Purchasing Managers' Index ("PMI") highlights a robust growth at 58.20 in December versus 53.70 being reported in November. The U.S. economy has also experienced an increase in the number of bankruptcy filings in the three quarters for the year, with 22,762 filings as on September 2024.

The new government would be coming to office from January 2025 and certain executive decisions are to be monitored in the coming months which would decide upon the trajectory of the economy. The wild fires in Los Angeles, which being a natural catastrophe, has impacted the country on a whole with initial losses being estimated at around US\$250.00 billion. The actions of the government can be monitored if any aid is provided to the people who have suffered losses due to the wild fires.

*Performance shown is at Sub-Fund level and gross of all fees and expenses.

Sustainable Finance Disclosure Regulation ("SFDR")

Northern Trust Developed Real Estate Index Fund is classified as an Article 6 fund under EU Sustainable Finance Disclosure Regulation and does not have as its objective sustainable investment, nor does it promote environmental and/or social characteristics. Sub-Fund Review

Since inception, the Sub-Fund has outperformed the benchmark index by 43 bps p.a. and returned 11.14%* p.a. while the benchmark has returned 10.71% p.a. For the year ended 31 December 2024, the Sub-Fund outperformed the benchmark index by 35 bps and returned 17.64%* against a benchmark return of 17.29%. The ex-post tracking error since inception is 0.05% and for 1 year is 0.03%. For the year ended 31 December 2024, the Sub-Fund experienced net outflows of US\$495.73 million. For the year under review, the Sub-Fund has tracked its benchmark index within its anticipated tracking error.

MSCI implemented changes to their series of indices end of February 2024. For MSCI World, there were 7 additions to and 20 deletions from the index. One-way index turnover was 0.60%.

MSCI implemented changes to their series of indices end of May 2024. For MSCI World, there were 10 additions to and 45 deletions from the index. One-way index turnover was 0.71%.

MSCI implemented changes to their series of indices end of August 2024. For MSCI World, there were 5 additions to and 24 deletions from the index. One-way index turnover was 0.49%.

MSCI implemented changes to their series of indices end of November 2024. For MSCI World, there were 10 additions to and 21 deletions from the index. One-way index turnover was 0.57%.

The index changes were carefully traded to minimise cost and deviation from the benchmark and were used as an opportunity to equitise some of the futures exposure.

*Performance shown is at Sub-Fund level and gross of all fees and expenses.

Reference Index

MSCI World Index

Sub-Fund Review

Since inception, the Sub-Fund has underperformed the reference index by 37 bps p.a. and returned 11.42%* p.a. while the reference index has returned 11.79% p.a. For the year ended 31 December 2024, the Sub-Fund underperformed the reference index by 126 bps and returned 17.41%* against a reference index return of 18.67%. The ex-post tracking error since inception is 2.79% and for 1 year is 2.53%. For the year ended 31 December 2024, the Sub-Fund experienced net inflows of US\$52.28 million. For the year under review, the Sub-Fund has tracked its reference index within its anticipated tracking error.

Global markets finished 2024 sharply higher. Better than expected economic data and improving inflation figures gave support to the market. The improvement in inflation data allowed the global central banks to begin lowering short term interest rates, further boosting investor confidence. In addition, credit spreads eased and commodity prices trended lower over the year. Communication Services and Information Technology were the best performing sectors, driven higher by U.S. mega-cap names. Materials and Health Care were the worst performing segments of the market.

During the year, the Sub-Fund underperformed the MSCI World reference index. By design, sector, country and currency allocation had a minimal effect on relative performance. Underperformance was driven by stock selection. High Quality names outperformed Low Quality names during the year, adding to performance. High Yielding names significantly underperformed Low Yielding securities, detracting from performance. Stock selection added to performance in the Information Technology and Consumer Staples sectors and detracted from performance in the Materials and Communication Services sectors.

*Performance shown is at Sub-Fund level and gross of all fees and expenses.

Sub-Fund Review

Since inception, the Sub-Fund has outperformed the benchmark index by 92 bps p.a. and returned 5.29%* p.a. while the benchmark has returned 4.37% p.a. For the year ended 31 December 2024, the Sub-Fund outperformed the benchmark index by 92 bps and returned 9.11%* against a benchmark return of 8.19%. The ex-post tracking error since inception is 0.22% and for 1 year is 0.18%. For the year ended 31 December 2024, the Sub-Fund experienced net inflows of US\$681.41 million. For the year under review, the Sub-Fund has tracked its benchmark index within its anticipated tracking error.

The start of the year 2024 was full of uncertainties in the markets with a fear of recession on the U.S. economy, ongoing conflict between Russia and Ukraine, tension in China - Taiwan and the key political U.S. Presidential elections scheduled for the fourth quarter of 2024. The data from the U.S. Bureau of Labor Statistics ("BLS"), such as inflation and unemployment were key indicators on the stance taken by the U.S. Federal Reserve ("Fed"). Inflation statistics were above the Fed's target range of around 2.00% and any signs of economic cool down were key indicators on the interest rate changes. The year on year inflation was 2.90% for December 2024, which is still above the Fed's target range of 2.00%. On the employment statistic, 2.23 million jobs have been created in the final year of the Biden Administration, highlighting a significant decline since 3 million jobs were created in 2023. However, the rate of unemployment has been slower at 4.10% in December 2024 giving a positive signal to the resilient economy. Also, there has been a reduction in job loss and the duration of unemployment. The U.S. and the global markets have been keeping an eye out for the interest rates decision by the Fed under Jerome Powell. During the initial two quarters of the year, the rates have been kept on hold between 5.25% to 5.50% after a series of hikes from 2020. However, the Fed made a rate cut in September 2024 which was followed by subsequent rate cuts twice in the fourth quarter of the year. The current range for interest rates at the end of 2024 is between 4.25% to 4.50%. Further decision on the trajectory of the interest rates would be made in January 2025. As currently, the U.S. debt ceiling is at US\$36.10 trillion which is expected to be breached in January 2025 as per the treasury secretary Janet Yellen. The victory in the U.S. presidential elections has paved a way for the Republican Candidate Donald Trump to the White House in the fourth quarter of 2024. The U.S. trade outlook with Mexico, China and other countries would be uncertain depending on the tariffs/sanctions being imposed by the new government.

The U.S. economy has been growing at a higher pace since reporting a growth rate of 1.60% in the first quarter of 2024 to a growth rate of 3.10% in the third quarter of 2024. The increase in the disposable personal income was US\$61.10 billion while the personal consumption expenditure increased to US\$81.30 billion in the month of November 2024. The international transactions highlighted an increase in current account deficit by US\$35.90 billion dollars for the third quarter of 2024. The automobile production is around 10.40 million units alone for the month of December which denotes a minimal change when compared with 10.16 million units produced in January. There has been a reduction in the exports of automobile units to around 57,000 units in the month of October when compared to September. The manufacturing sector showed a minor growth where the U.S. Institute for Supply Management ("ISM") manufacturing index was at 49.30 in December showing some optimism for this sector when compared to 48.40 being reported in November. Also, the ISM U.S. services Purchasing Managers' Index ("PMI") highlights a robust growth at 58.20 in December versus 53.70 being reported in November. The U.S. economy has also experienced an increase in the number of bankruptcy filings in the three quarters for the year, with 22,762 filings as on September 2024.

The new government would be coming to office from January 2025 and certain executive decisions are to be monitored in the coming months which would decide upon the trajectory of the economy. The wild fires in Los Angeles, which being a natural catastrophe, has impacted the country on a whole with initial losses being estimated at around US\$250.00 billion. The actions of the government can be monitored if any aid is provided to the people who have suffered losses due to the wild fires.

*Net performance for Class B Euro Accumulating used as representative performance for the Sub-Fund.

Report on the audit of the financial statements

Opinion

We have audited the financial statements of the Sub-Funds of Northern Trust UCITS Common Contractual Fund ('the Fund' or "the CCF") for the year ended 31 December 2024 set out on pages 25 to 122, which comprise the Statement of Financial Position, the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units and related notes, including the Statement of significant accounting policies set out on note pages 61 to 65.

The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland* issued in the United Kingdom by the Financial Reporting Council.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of each of the Sub-Funds of the CCF as at 31 December 2024 and of its changes in net assets attributable to holders of redeemable participating units for the year then ended;
- the financial statements have been properly prepared in accordance with FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland*; and
- the financial statements have been properly prepared in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Sub-Funds in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the managers' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Sub-Funds' ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue with the exception of Northern Trust North America Value ESG Fund and Northern Trust World EUR Hedged Equity Index Fund.

Our responsibilities and the responsibilities of the Manager with respect to going concern are described in the relevant sections of this report.

Emphasis of matter - Northern Trust North America ESG Fund and Northern Trust World EUR Hedged Equity Index Fund

We draw attention to the disclosure made in the statement of significant accounting policies on page 62 of the financial statements which explains that the financial statements of Northern Trust North America Value ESG Fund and Northern Trust World EUR Hedged Equity Index Fund are not prepared on a going concern basis for the reason set out in statement. Our opinion is not modified in respect of this matter.

Other information

The Manager is responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the Management and Other Information, Statement of Manager's Responsibilities, Depositary's Report to Unitholders, Investment Reviews, Appendix I: Unaudited Portfolio Statements, Appendix II: Unaudited Portfolio Changes - Material Acquisitions and Disposals, Appendix III: Unaudited Supplementary Information, Appendix IV: Securities Financing Transaction Regulations (Unaudited) and Appendix V: Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited). The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work undertaken during the course of the audit we have not identified material misstatements in the other information.

Respective responsibilities and restrictions on use

Responsibilities of the Manager for the financial statements

As explained more fully in the Manager's responsibilities statement set out on page 2, the Manager is responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Sub-Funds of the Fund or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Sub-Funds' unitholders, as a body, in accordance with Regulation 93 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011. Our audit work has been undertaken so that we might state to the Sub-Funds' unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Sub-Funds and the Sub-Funds' unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

For the year ended 31 December 2024

Background

Northern Trust UCITS Common Contractual Fund (the “CCF”) is an open-ended umbrella common contractual fund constituted by the Deed of Constitution and is authorised by the Central Bank of Ireland as a UCITS pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

At 31 December 2024, the CCF comprised nineteen (2023: nineteen) Sub-Funds (each a “Sub-Fund”, collectively the “Sub-Funds”) of which two (2023: two) are terminated.

Northern Trust North America Value ESG Fund and Northern Trust World EUR Hedged Equity Index Fund terminated on 31 January 2023 and 4 April 2023, respectively.

The following table details the Sub-Funds currently available for subscription:

Sub-Fund Name	Launch Date	Investment Objective
Northern Trust World Equity Index Fund	10 November 2010	The investment objective of Northern Trust World Equity Index Fund is to closely match the risk and return characteristics of the MSCI World Index with net dividends reinvested.
Northern Trust Europe Custom ESG Equity Index Fund	20 April 2012	The investment objective of Northern Trust Europe Custom ESG Equity Index Fund is to closely match the risk and return characteristics of the MSCI Europe Custom ESG Index with net dividends reinvested.
Northern Trust World Custom ESG Equity Index Fund	09 December 2013	The investment objective of Northern Trust World Custom ESG Equity Index Fund is to closely match the risk and return of the MSCI World Custom ESG Index with net dividends reinvested.
Northern Trust World Custom ESG EUR Hedged Equity Index Fund	01 April 2014	The investment objective of Northern Trust World Custom ESG EUR Hedged Equity Index Fund is to closely match the risk and return of the MSCI World Custom ESG 100% Hedged to EUR Index with net dividends reinvested.
Northern Trust Europe Value ESG Fund	13 November 2018	The investment objective of Northern Trust Europe Value ESG Fund is to deliver long-term capital growth by investing in securities which exhibit value, quality and momentum factors excluding securities that do not meet certain environmental, social and governance (“ESG”) criteria.
Northern Trust Developed Real Estate Index Fund	30 January 2015	The investment objective of Northern Trust Developed Real Estate Index Fund is to closely match the risk and return of the FTSE EPRA/NAREIT Developed Index with net dividends reinvested.
Northern Trust North America Custom ESG Equity Index Fund	21 December 2015	The investment objective of Northern Trust North America Custom ESG Equity Index Fund is to closely match the risk and return characteristics of the MSCI North America Custom ESG Index with net dividends reinvested.
Northern Trust World ESG Leaders Equity Index Fund	31 October 2017	The investment objective of Northern Trust World ESG Leaders Equity Index Fund is to closely match the risk and return characteristics of the MSCI World ESG Leaders Index with net dividends reinvested.
Northern Trust World Small Cap ESG Low Carbon Index Fund	06 June 2019	The investment objective of Northern Trust World Small Cap ESG Low Carbon Index Fund is to closely match the risk and return characteristics of the MSCI World Small Cap Custom ESG Low Carbon Index with net dividends reinvested.
Northern Trust World Green Transition Index Fund	27 September 2019	The investment objective of the Northern Trust World Green Transition Index Fund is to closely match the risk and return characteristics of the MSCI World Custom ESG Climate Series A Index with net dividends reinvested.
Northern Trust High Dividend ESG World Equity Fund	05 December 2019	The investment objective of the Northern Trust High Dividend ESG World Equity Fund is to deliver long-term capital growth by investing in a diverse portfolio of high quality dividend paying companies whilst controlling for market risk and aiming for an improvement on the environment, social and governance (“ESG”) characteristics of the portfolio.
NT Europe SDG Screened Low Carbon Index Fund	06 May 2020	The investment objective of the NT Europe SDG Screened Low Carbon Index Fund is to closely match the risk and return characteristics of the MSCI Europe Select ESG Leaders Low Carbon Impact G Series Index with net dividends reinvested.
NT World SDG Screened Low Carbon Index Fund	22 March 2021	The investment objective of the NT World SDG Screened Low Carbon Index Fund is to closely match the risk and return characteristics of the MSCI World Select ESG Leaders Low Carbon Impact G Series Index with net dividends reinvested.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

For the year ended 31 December 2024

Background (continued)

Sub-Fund Name	Launch Date	Investment Objective
Northern Trust Quality Low Vol Low Carbon World Fund	23 June 2021	The investment objective of the Northern Trust Quality Low Vol Low Carbon World Fund is to deliver long-term capital growth by investing in diverse portfolio of high quality low volatility companies whilst maintaining lower absolute volatility than the MSCI World Index and excluding securities that do not meet certain environmental, social and governance ("ESG") criteria whilst seeking a reduction in carbon intensity and potential emissions from fossil fuels relative to the Index.
Northern Trust Developed Real Estate ESG Climate Index Fund	12 August 2022	The investment objective of the Northern Trust Developed Real Estate ESG Climate Index Fund is to closely match the risk and return characteristics of the Solactive Developed Real Estate ESG Climate Index NTR with net dividends reinvested.
Northern Trust World Natural Capital PAB Index Fund II	11 November 2022	The investment objective of the Northern Trust World Natural Capital PAB Index Fund II is to closely match the risk and return characteristics of the MSCI World Natural Capital Paris-Aligned Equity Select Index with net dividends reinvested.
Northern Trust World Natural Capital Paris-Aligned Equity Index Fund	12 December 2023	The investment objective of the Northern Trust World Natural Capital Paris-Aligned Equity Index Fund is to closely match the risk and return characteristics of the MSCI World Natural Capital Paris-Aligned Equity Custom Index with net dividends reinvested.

Subject to the requirements of the Central Bank of Ireland, each of the Sub-Funds may invest in the other Sub-Funds of the CCF. The Sub-Funds did not engage in any such cross-investment during the year ended 31 December 2024 or the year ended 31 December 2023.

Neither the CCF nor any Sub-Fund is an incorporated entity and neither the CCF nor any Sub-Fund has a separate legal personality.

Basis of Accounting

(i) Statement of Compliance

These financial statements have been prepared in accordance with FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland*, the UCITS Regulations and the Central Bank UCITS Regulations.

(ii) Going Concern

Management has a reasonable expectation that the Sub-Funds, except for Northern Trust North America Value ESG Fund and Northern Trust World EUR Hedged Equity Index Fund, have adequate resources to continue in operational existence for the foreseeable future. Therefore the Sub-Funds, except for Northern Trust North America Value ESG Fund and Northern Trust World EUR Hedged Equity Index Fund which terminated during the previous year end on 31 January 2023 and 4 April 2023, respectfully, due to investor redemptions, continue to adopt the going concern basis of accounting in preparing these financial statements.

(iii) Basis of Measurement

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of financial assets and financial liabilities (including financial derivative instruments) at fair value through profit or loss.

As permitted by FRS 102, the Sub-Funds have chosen to apply the recognition and measurement requirements of IAS 39 *Financial Instruments* to the financial instruments that fall within the scope of Sections 11 and 12 of the standard. As required by FRS 102, the presentation and disclosure requirements of Sections 11 and 12 of the standard have also been applied.

The financial statements and comparative information of all Sub-Funds are for the year ended 31 December 2024 and year/period ended 31 December 2023 respectively.

The year end valuations were completed on 31 December 2024, which was the last business day of the year (2023: 29 December 2023).

(iv) Statement of Cash Flows

The Sub-Funds have availed of the exemption available to investment funds under FRS 102 (Section 7.1A(c)) not to prepare a Statement of Cash Flows.

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the Sub-Funds' financial statements.

Dividend Income and Bank Interest

Dividend income is recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

Bank interest is accounted for on an effective interest rate basis.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

For the year ended 31 December 2024

Fees and Expenses

Investment management fees, administration fees, depositary fees and other operating expenses are charged to the Statement of Comprehensive Income on an accruals basis.

Financial Instruments

(i) Classification

In accordance with IAS 39, the Sub-Funds classify investments in equity and financial derivative instruments into the financial assets and financial liabilities at fair value through profit or loss category.

The category of financial assets and financial liabilities at fair value through profit or loss comprises:

- *Financial instruments held for trading:* These comprise investments in equities, futures contracts and forward currency contracts. These instruments are acquired principally for the purpose of generating a profit from short-term fluctuations in price.
- *Financial instruments designated at fair value through profit or loss upon initial recognition:* These include financial assets that are not held for trading purposes and which may be sold. The Sub-Funds did not have any financial instruments designated at fair value through profit and loss upon initial recognition at 31 December 2024 or 31 December 2023.

Financial assets that are classified as loans and receivables include cash and cash equivalents, margin cash, dividends receivable, subscriptions receivable, securities sold receivable, withholding tax reclaims receivable, expense rebate receivable and other assets.

Financial liabilities that are not at fair value through profit or loss include redemptions payable, securities purchased payable, fees payable, other expenses payable and liabilities, and financial liabilities arising on redeemable participating units.

(ii) Measurement

Financial instruments at fair value through profit or loss are initially recognised at fair value, with transaction costs recognised in the Statement of Comprehensive Income. Financial assets or financial liabilities not at fair value through profit or loss are initially recognised at fair value plus transaction costs that were directly attributable to their acquisition or issue.

Subsequent to initial recognition, all financial instruments classified at fair value through profit or loss, are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income.

Financial assets classified as loans and receivables are measured at amortised cost using the effective interest rate method, less impairment losses, if any.

Financial liabilities not at fair value through profit or loss, other than those arising on redeemable participating units, are measured at amortised cost using the effective interest rate. Financial liabilities arising from the redeemable units issued by the Sub-Funds are carried at the redemption amount representing the investors' right to a residual interest in the Sub-Funds' assets.

(iii) Fair Value Measurement Principles

The fair value of financial instruments traded in active markets is based on quoted market prices at the measurement date. Financial instruments traded in active markets are measured at their last traded prices.

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

The fair value of the derivatives that are not exchange traded is estimated at the amount that the Sub-Funds would receive or pay to terminate the contract at the measurement date taking into account the current market conditions and the credit worthiness of the counterparties.

(iv) Impairment

Financial assets that are stated at cost or amortised cost are reviewed at each measurement date to determine whether there is objective evidence of impairment. If any such indication exists, an impairment loss is recognised in the Statement of Comprehensive Income as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate.

If the amount of an impairment loss recognised on a financial asset carried at amortised cost subsequently decreases and the decrease can be linked objectively to an event occurring after the write-down, then the write-down is reversed through the Statement of Comprehensive Income.

(v) Recognition and Derecognition

The Sub-Funds recognise financial assets and financial liabilities on the trade date, the date the Sub-Funds become party to the contractual provisions of the instrument, or on the date on which they are originated.

A financial asset is derecognised when the Sub-Funds lose control over the contractual rights to the cash flows that comprise that asset. This occurs when the rights are realised, expire or are surrendered and control is not retained. A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expires.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

For the year ended 31 December 2024

Financial Instruments (continued)

(vi) Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Sub-Funds had not acquired, issued or disposed of the financial instrument. Transaction costs are recognised in the Statement of Comprehensive Income, when incurred, as an expense.

Forward Currency Contracts

Unrealised gains or losses on open forward currency contracts are calculated by reference to the difference between the contracted rate and the rate to close out the contract as at the measurement date. Realised gains or losses include net gains or losses on contracts which have been settled.

Futures Contracts

For open futures contracts, changes in the value of the contract are recognised as unrealised gains or losses by “marking to market” the value of the contract at the measurement date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a realised gain or loss.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results could differ from those estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Use of Judgements

Information about significant areas of critical judgement in applying accounting policies is included in *Financial Instruments: Fair Value Measurement Principles* above.

Taxation

The CCF is a common contractual fund as defined in section 739I of the Tax Consolidation Act, 1997 (TCA), in which the unitholders by contractual arrangement participate and share in the property of the Sub-Funds as co-owners. The CCF and the Sub-Funds are transparent for Irish tax purposes and do not have separate legal personality.

Section 739I of the TCA provides that a common contractual fund shall not be chargeable to tax in respect of its relevant income and relevant gains (“relevant profits”). Instead, the relevant profits of the common contractual fund shall be treated as arising, or as the case may be, accruing to each unitholder of the common contractual fund in proportion to the value of the units beneficially owned by the unitholder, as if the relevant profits had arisen or as the case may be, accrued, to the unitholders in the common contractual fund without passing through the hands of the common contractual fund. This tax treatment is subject to each of the units of the common contractual fund:

- (a) being an asset of a pension fund or being beneficially owned by a person other than an individual; or
- (b) being held by an intermediary, a depositary or trustee for the benefit of a person other than an individual.

It is the intention of the Manager that the Sub-Funds should meet these conditions.

On the basis that the units of the Sub-Funds are held by persons described above and that the CCF is constituted other than under trust law, the Sub-Funds shall not be chargeable to tax in respect of their relevant profits.

Withholding Tax Reclaims

Dividends received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Sub-Funds or its unitholders. Withholding tax reclaims receivable are included in the Statement of Financial Position. Withholding tax reclaims are recorded in the relevant Class with recognition on an accruals basis, effective from the ex-date of the relevant income.

Cash and cash equivalents

Cash and cash equivalents comprise current deposits with banks and investments in Money Market Funds.

Margin Cash

Margin cash provided by the Sub-Funds to counterparty in relation to futures contracts is presented in the Statement of Financial Position as margin cash.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

For the year ended 31 December 2024

Distributions Policy

As a result of the classification of its redeemable participating units as equity, Northern Trust Europe Value ESG Fund distributions are recognised in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units. As a result of the classification of their redeemable participating units as liabilities, all other Sub-Funds' distributions are recognised in the Statement of Comprehensive Income as finance costs.

Redeemable Participating Units

The Sub-Funds classify financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments.

All the Sub-Funds' redeemable participating units provide investors with the right to require redemption for cash at the value proportionate to the investor's share in the Sub-Fund's net assets at each daily redemption date.

In accordance with IAS 32, a puttable financial instrument that includes a contractual obligation for a Sub-Fund to repurchase or redeem that instrument for cash or another financial asset is classified as equity if it meets all of the following conditions:

- it entitles the holder to a pro rata share of the Sub-Fund's net assets in the event of the Sub-Fund's liquidation;
- it is in the class of instruments that is subordinate to all other classes of instruments;
- all financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- apart from the contractual obligation for the Sub-Fund to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- the total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Sub-Fund over the life of the instrument.

Of the active Sub-Funds, sixteen Sub-Funds' redeemable participating units do not meet these conditions and are classified as financial liabilities measured at the amortised cost of their redemption amount. The redeemable participating units of Northern Trust Europe Value ESG Fund is classified as equity.

During the year, Northern Trust North America Custom ESG Equity Index Fund and Northern Trust World Natural Capital Paris-Aligned Equity Index Fund changed classification of redeemable participating units from equity to liabilities.

Anti-Dilution Levy

An Anti-dilution Levy can be applied to net subscriptions or net redemptions on any Dealing Day. This Anti-Dilution Levy is designed to be charged at the discretion of the Directors. The Anti-Dilution Levy is designed to cover the costs of dealing in the various markets and preserve the value of the underlying assets of the Sub-Funds.

Foreign Currency

The functional and presentation currency of the CCF is Euro ("€"). The assets and liabilities at the date of the financial statements are denominated per Sub-Fund as follows:

Northern Trust World Equity Index Fund	United States Dollar
Northern Trust Europe Custom ESG Equity Index Fund	Euro
Northern Trust World Custom ESG Equity Index Fund	United States Dollar
Northern Trust World Custom ESG EUR Hedged Equity Index Fund	Euro
Northern Trust Europe Value ESG Fund	Euro
Northern Trust North America Value ESG Fund	United States Dollar
Northern Trust Developed Real Estate Index Fund	United States Dollar
Northern Trust World EUR Hedged Equity Index Fund	Euro
Northern Trust North America Custom ESG Equity Index Fund	United States Dollar
Northern Trust World ESG Leaders Equity Index Fund	United States Dollar
Northern Trust World Small Cap ESG Low Carbon Index Fund	Euro
Northern Trust World Green Transition Index Fund	Euro
Northern Trust High Dividend ESG World Equity Fund	United States Dollar
NT Europe SDG Screened Low Carbon Index Fund	Euro
NT World SDG Screened Low Carbon Index Fund	Euro
Northern Trust Quality Low Vol Low Carbon World Fund	United States Dollar
Northern Trust Developed Real Estate ESG Climate Index Fund	United States Dollar
Northern Trust World Natural Capital PAB Index Fund II	United States Dollar
Northern Trust World Natural Capital Paris-Aligned Equity Index Fund	United States Dollar

The CCF has adopted the functional currency of each individual Sub-Fund as its presentation currency. The Sub-Funds may issue unit classes denominated in a currency other than its functional currency. Information in respect of the Sub-Funds' units is presented in their denominated currency as it is more relevant to investors.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

For the year ended 31 December 2024

1. Fees and Expenses

The Manager is entitled to charge a fee out of the assets of each Sub-Fund of up to 1% of the net assets of the Sub-Fund for all reasonable out of pocket costs and expenses incurred in the performance of its duties.

The Investment Manager is entitled to receive a fee out of the assets of each Sub-Fund of up to 1% of the net assets of the Sub-Fund. The Investment Manager is also entitled to be reimbursed out of the assets of each Sub-Fund for all reasonable out of pocket costs and expenses incurred in the performance of its duties.

The following fee tariffs in relation to each Sub-Fund are set out below:

Fund Administration, Depositary & Custody:

Annual Net Asset Value Based Fee from the umbrella fund paid monthly in arrears of:

- 3.0 bps of the Net Asset Value of the Sub-Fund until the total AUM of the NT UCITS CCF umbrella reaches US\$5bn;
- 2.9 bps of the Net Asset Value of the Sub-Fund when the total AUM of the NT UCITS CCF umbrella is between US\$5bn & US\$10bn;
- 2.6 bps of the Net Asset Value of the Sub-Fund when the total AUM of the NT UCITS CCF umbrella is between US\$10bn & US\$15bn;
- 2.4 bps of the Net Asset Value of the Sub-Fund when the total AUM of the NT UCITS CCF umbrella is over US\$15bn;

60% of the fees set forth above shall be due to the Administrator and 40% shall be due to the Depositary, of which 10% will be with respect to depositary services and 30% will be payable with respect to custody services.

The Administrator shall also be entitled to receive:

Company Secretarial – US\$Nil (2023: US\$10,000) fixed fee at umbrella level. Effective 1 January 2024, the Secretary of the Manager changed to Matsack Trust Limited. Corporate secretarial fees are included in professional services fees for the year ended 31 December 2024.

The Depositary shall also be entitled to receive out of the assets of each Sub-Fund redemption TT (“Telegraphic Transfer”) charges in accordance to the below fee tariff:

- €9.00 per redemption payment effected
- US\$7.00 per redemption payment effected
- £7.00 per redemption payment effected

TT charges on receipt of monies have been waived. Monthly account maintenance charges have also been waived.

The actual fees earned by the Investment Manager, the Administrator, the Depositary and the Manager for the year are disclosed in Note 4.

Audit fees of €167,374 (excluding VAT), were incurred in relation to the statutory audit of the financial statements of the Sub-Funds for the year ended 31 December 2024 (2023: €173,773 (excluding VAT)). No other services were provided by the statutory auditor to the Sub-Funds for the year ended 31 December 2024 (2023: None).

Since 31 December 2024, no distributions have yet been proposed or declared by the Directors of the Manager.

2. Distributions

Total distributions declared 25 November 2024 (2023: 27 November 2023) and paid by the Sub-Funds during the year/period ended 31 December 2024 and 31 December 2023 were as follows:

	31 December 2024	31 December 2023
Northern Trust World Equity Index Fund	US\$12,662,952	US\$9,293,837

6. Financial Instruments and Associated Risks

The Sub-Funds' activities expose them to a variety of financial risks: market risk (including price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Sub-Funds' overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Sub-Funds' financial performance. Each Sub-Fund may use financial derivative instruments to moderate certain risk exposures.

The Investment Manager assesses the risk profile of the Sub-Funds on the basis of their investment policies, strategies and their use made of financial derivative instruments. Based on the risk profile, the Investment Manager has determined to calculate global exposure for all Sub-Funds using the commitment approach.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

NOTES FORMING PART OF THE FINANCIAL STATEMENTS (continued)

For the year ended 31 December 2024

6. Financial Instruments and Associated Risks (continued)

The investment objectives of the Sub-Funds are detailed on pages 62 and 63. The Sub-Funds, except Northern Trust Europe Value ESG Fund, Northern Trust North America Value ESG Fund, Northern Trust High Dividend ESG World Equity Fund and Northern Trust Quality Low Vol Low Carbon World Fund, seek to achieve their investment objectives through investing primarily in a diversified portfolio of transferable equity securities issued by companies within their respective indices. Northern Trust Europe Value ESG Fund and Northern Trust North America Value ESG Fund seek to achieve its investment objectives through investing in securities which exhibit value, quality and momentum factors excluding securities that do not meet certain environmental, social and governance criteria. Northern Trust High Dividend ESG World Equity Fund seeks to achieve its investment objectives through investing in a diverse portfolio of high quality dividend paying companies whilst controlling for market risk and aiming for an improvement on the environment, risk and governance characteristic of the portfolio. Northern Trust Quality Low Vol Low Carbon World Fund seeks to achieve its investment objectives through investing in a diverse portfolio of high quality low volatility companies, excluding securities that do not meet certain environmental, social and governance criteria whilst seeking a reduction in carbon intensity and potential emissions from fossil fuels. The Sub-Funds may also invest (up to 10% of their net asset value) indirectly in equities comprised within their respective indices through holdings in open-ended investment funds (including exchange traded funds). Any such investment funds will have investment objectives which are materially similar to the Sub-Funds.

Market Risk

(i) Price Risk

Price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment or its issuer or factors affecting all instruments traded in the market. The Sub-Funds' investments are susceptible to price risk arising from uncertainties about future prices of these instruments. The Sub-Funds' price risk is managed by investing primarily in a diversified portfolio of companies listed or traded on a regulated stock exchange or market.

The Sub-Funds may use the following derivative instruments solely for efficient portfolio management or hedging purposes: exchange traded futures contracts and forward currency contracts.

The Sub-Funds' overall market positions are monitored on a daily basis by the Investment Manager and are reviewed on a periodic basis by the Manager.

The tables below detail the concentration of the investments held by the Sub-Funds by asset and liability class as at 31 December 2024:

*Sub-Fund launched on 12 December 2023.

The Northern Trust North America Value ESG Fund and Northern Trust World EUR Hedged Equity Index Fund do not have a price risk or sensitivity disclosure for 31 December 2023 as the Sub-Funds terminated on 31 January 2023 and 4 April 2023, respectively.

If the value of the underlying securities held by each Sub-Fund as at 31 December 2024 and 31 December 2023 had increased or decreased by 5%, with all other variables held constant, this would have increased or decreased respectively net assets attributable to holders of redeemable participating units by the amounts shown below. The Manager believes that a movement of 5% is reasonably possible.

	31 December 2024	31 December 2023

Northern Trust World Natural Capital Paris-Aligned Equity Index Fund*	US\$90,990,531	US\$1,046,112

*Sub-Fund launched on 12 December 2023.

(ii) Interest Rate Risk

Substantially all of the Sub-Funds' financial assets and financial liabilities are non-interest bearing. Any excess cash is invested in ancillary liquid assets at short-term market interest rates. As a result, the Sub-Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

(iii) Currency Risk

The Sub-Funds may hold financial instruments denominated in currencies other than their functional currencies. They may therefore be exposed to currency risk, as the value of the financial assets and financial liabilities denominated in other currencies will fluctuate due to changes in exchange rates.

The Sub-Funds may enter into currency exchange transactions in an attempt to protect against changes in currency exchange rates between the trade and settlement dates of specific securities transactions or anticipated securities transactions. The Sub-Funds may also enter into forward contracts to hedge against a change in currency exchange rates that would cause a decline in the value of existing investments denominated or principally traded in a currency other than the functional currency of the Sub-Funds. To do this, the Sub-Funds would enter into a forward contract to sell the currency in which the investment is denominated or principally traded in exchange for the functional currency of the Sub-Funds.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

NOTES FORMING PART OF THE FINANCIAL STATEMENTS (continued)

For the year ended 31 December 2024

6. Financial Instruments and Associated Risks (continued)

As at 31 December 2024 and 31 December 2023, had the exchange rate between the functional currency of each Sub-Fund and the non-functional currencies to which the Sub-Funds are exposed decreased by 5%, with all other variables held constant, this would have increased or decreased net assets attributable to holders of redeemable participating units by approximately the amounts shown below. An increase of 5% would have had an equal but opposite effect. The Manager believes that a movement of 5% is reasonably possible.

	31 December 2024	31 December 2023

*Sub-Fund terminated on 31 January 2023.

**Sub-Fund launched on 12 December 2023.

In accordance with the Sub-Funds' policies, the Investment Manager monitors the Sub-Funds' currency risk on a daily basis. If there are material issues the Manager is notified by the Investment Manager.

Credit Risk

The Sub-Funds are exposed to credit risk, which is the risk that a counterparty will fail to discharge an obligation resulting in a financial loss to a Sub-Fund. Impairment provisions are provided for losses that have been incurred by the year end, if any. The carrying amounts of financial assets best represent the maximum credit risk exposure at the year end. This relates also to financial assets carried at amortised cost, as they have a short-term to maturity.

The following tables below set out the carrying amounts of the Sub-Funds' financial assets exposed to credit risk as at 31 December 2024:

	Northern Trust World Equity Index Fund 31 December 2024 US\$	Northern Trust Europe Custom ESG Equity Index Fund 31 December 2024 €	Northern Trust World Custom ESG Equity Index Fund 31 December 2024 US\$	Northern Trust World Custom ESG EUR Hedged Equity Index Fund 31 December 2024 €	Northern Trust Europe Value ESG Fund 31 December 2024 €

*Sub-Fund launched on 12 December 2023.

The Investment Manager analyses credit concentration based on the counterparty, industry and geographical location of the financial assets that the Sub-Funds hold.

Credit risk is managed by monitoring the credit quality and financial positions of the Depositary and the counterparties the Sub-Funds use.

Substantially all of the cash assets and financial instruments of the Sub-Funds are held with The Northern Trust Company. Further details are disclosed in the Depositary's Credit Risk Statement.

As at 31 December 2024, the counterparty of the futures contracts had the following credit ratings from Standard & Poor's: Citigroup Global Markets Ltd: A+ (2023: A+); and Bank of America Merrill Lynch International: A+ (2023: A+).

As at 31 December 2024, the counterparties of the forward currency contracts had the following credit ratings from Standard & Poor's: TD Bank: A+ (2023: AA-); Goldman Sachs: A+ (2023: A+); UBS: A+ (2023: A+); JP Morgan: A (2023: A-); Morgan Stanley: A+ (2023: A+); Bank of Montreal: A+ (2023: A+); Northern Trust: A+ (2023: A+).

All transactions in equities are settled/paid for upon delivery using approved brokers. The risk of default is not considered to be significant, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. In accordance with the Sub-Funds' policies, the Investment Manager monitors the Sub-Funds' exposure to credit risk on a daily basis.

Depositary's Credit Risk Statement

Northern Trust Fiduciary Services (Ireland) Limited ("NTFSIL") is the appointed Depositary of the Sub-Funds, responsible for the safe-keeping of assets. NTFSIL has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both NTFSIL and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at year end date 31 December 2024, NTC had a long term credit rating from Standard & Poor's of A+ (2023: A+).

TNTC (as global sub-custodian of NTFSIL) does not appoint external sub-custodians within the U.S., the U.K., Ireland, Canada, Belgium, France, Germany, Netherlands and Saudi Arabia. However, in all other markets, TNTC appoints local external sub-custodians.

NTFSIL, in the discharge of its depositary duties, verifies the Sub-Fund's ownership of Other Assets, (as defined under Other Assets, Art 22(5) of UCITS V Directive 2014/19/EU), by assessing whether the Sub-Fund holds the ownership based on information or documents provided by the Sub-Fund or where available, on external evidence.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Sub-Fund, clearly identifiable as belonging to the Sub-Fund, and distinct and separately from the proprietary assets of TNTC, NTFSIL and NTC.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

NOTES FORMING PART OF THE FINANCIAL STATEMENTS (continued)

For the year ended 31 December 2024

6. Financial Instruments and Associated Risks (continued)

Credit Risk (continued)

In addition TNTC, as banker, holds cash of the Sub-Fund on deposit. Such cash is held on the Statement of Financial Position of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Sub-Fund will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Where relevant, please note the following currencies, Jordanian Dinar, Saudi Riyal, cash in the onshore China market (principally the currency of Chinese Yuan Renminbi, and any other currencies remitted into accounts in the onshore China market), are no longer held on the Balance Sheet of TNTC. For these off-book currencies, clients' cash exposure is directly to the relevant local sub-custodian/financial institution in the market.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Sub-Fund's rights with respect to its assets to be delayed.

The Responsible Party (the Board of Directors or its delegates) manages risk by monitoring the credit quality and financial position of the Depositary and such risk is further managed by the Depositary monitoring the credit quality and financial positions of sub-custodian appointments.

Cross Liability Risk

The CCF has segregated liability between its Sub-Funds and accordingly any liability incurred on behalf of or attributable to any Sub-Fund shall be discharged solely out of the assets of that Sub-Fund.

Liquidity Risk

The main liability of the Sub-Funds is the redemption of any units that investors wish to sell. The Prospectus provides for the daily creation and cancellation of units and the Sub-Funds are therefore exposed to the liquidity risk of meeting unitholder redemptions at any time. The Sub-Funds' financial instruments include investments in equities, which can normally be easily liquidated at an amount close to fair value in order to meet liquidity requirements.

The Sub-Funds may, from time to time, invest in derivative contracts traded over-the-counter, which are not traded in an organised market and may be illiquid. As a result, the Sub-Funds may not be able to liquidate quickly their investments in these instruments at an amount close to their fair value to meet their liquidity requirements or to respond to specific events such as deterioration in the creditworthiness of any particular issuer.

In accordance with the Sub-Funds' policies, the Investment Manager monitors the Sub-Funds' liquidity risk on a daily basis and the Manager reviews it on a periodic basis.

The following tables show the residual contractual maturities of the Sub-Funds' financial liabilities as at the year end:

*Sub-Fund launched on 12 December 2023.

As a result of the classification of its units as equity, Northern Trust Europe Value ESG Fund's net assets attributable to holders of redeemable participating units is not included in the above analyses of financial liabilities as at 31 December 2024.

7. Fair Value Estimation

FRS 102 requires the Sub-Funds to classify financial instruments measured at fair value into the following hierarchy:

- Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices); and
- Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes observable data may require significant judgement by management. Management considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables analyse within the fair value hierarchy the Sub-Funds' financial assets and financial liabilities measured at fair value through profit or loss as at 31 December 2024:

*Sub-Fund launched on 12 December 2023.

Financial instruments whose values are based on quoted market prices in active markets, and therefore are classified as Level 1, include active listed equities and investment funds and exchange traded derivatives. The Sub-Funds do not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified as Level 2. These include listed equities whose trading was inactive as at the year-end, unlisted investment funds and over-the-counter derivatives. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Financial instruments classified within Level 3 have significant unobservable inputs, as they trade infrequently. There were no instruments classified as Level 3 as at 31 December 2024 or 31 December 2023.

Most of the Sub-Funds' financial instruments are measured at fair value on the Statement of Financial Position. Usually, the fair value of these financial instruments can be reliably determined within a reasonable range of estimates. For certain, other financial instruments, including cash and cash equivalents, margin cash, dividends receivable, subscriptions receivable, securities sold receivable, other assets, redemptions payable, securities purchased payable, expenses payable and other liabilities the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The carrying value of all Sub-Funds' financial assets and financial liabilities at the year end approximated their fair values.

9. Efficient Portfolio Management

The Sub-Funds may, subject to the relevant restrictions set out by the Central Bank of Ireland, use the following instruments for efficient portfolio management or hedging purposes: exchange traded futures contracts and forward currency contracts. During the year, the Sub-Funds entered into futures contracts and forward currency contracts for such purposes.

Open futures contracts and forward currency contracts, including the relevant counterparties, the underlying securities, indices or currencies, and their fair values and underlying exposures at the year end are disclosed in the Portfolio and Statement of Investments for each Sub-Fund. Realised and unrealised gains and losses on futures contracts and forward currency contracts transactions during the year are disclosed in the Statement of Comprehensive Income for each Sub-Fund.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND**NOTES FORMING PART OF THE FINANCIAL STATEMENTS (continued)***For the year ended 31 December 2024***10. Exchange Rates**

Swiss Franc	0.93842	0.92973
U.S. Dollar	1.03550	1.10465

11. Securities Lending

The CCF has a securities-lending program whereby the Sub-Funds can lend securities to approved brokers. The Securities Lending Agent is TNTC. The Northern Trust Company is a Related Party of the CCF as further outlined in Note 4. The CCF receives cash, letters of credit or eligible instruments as collateral for loans of its securities to these approved borrowers.

Income earned from the investment of cash collateral, net of (1) expenses, including but not limited to, transaction accounting and reporting expenses, auditing fees, brokerage fees and other commissions, and any miscellaneous expenses, (2) any applicable payment or withholding of tax, (3) loan rebate fees paid or accrued to the borrowers, and (4) any adjustments to provide for regular returns as provided below, together with loan fees for loans collateralized by non-cash collateral, is distributed to participating lenders of the collateral section on a monthly basis in the currency in which the income was earned. Income shall be credited and recorded as interest income, on the fifteenth day of each month.

Initial collateral levels will not be less than:

- 102% of the market value of borrowed securities; and
- 105% if borrowed securities and the collateral are denominated in different currencies.

Initial collateral levels will not be less than:

- Cash in the form of U.S. Dollars, British Pound Sterling and Euro;
- Obligations issued or guaranteed by United States, United Kingdom and other OECD member states or their local governments, agencies, instrumentalities or authorities;
- Obligations issued by supranational entities; and
- Equity issues which are part of indices approved by the Agent's appropriate credit committee, at the time of receipt and are subject to a concentration limit.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

NOTES FORMING PART OF THE FINANCIAL STATEMENTS (continued)

For the year ended 31 December 2024

11. Securities Lending (continued)

Eligible investments:

- Daily dealing money market funds which have and maintain a rating of Aaa or equivalent, including units of Northern Trust Global Funds plc; and
- End of day residual cash balances, which cannot be invested in the marketplace will be swept into a short term investment with TNTC and any of its worldwide branches or affiliated U.S. or non-U.S. banks or bank holding companies.

The internal securities depository system used for stock lending is a system called ‘GSL’ – Global Securities Lending.

The Northern Trust World Natural Capital Paris-Aligned Equity Index Fund earned securities lending income of US\$39,241 (2023: US\$Nil) for the year ended 31 December 2024 of which US\$16,818 (2023: US\$Nil) was paid to TNTC. Income earned by each Sub-Fund is included in the Statement of Comprehensive Income on pages 39 to 45.

The below table shows the value of stock out on loan by borrower as at 31 December 2024:

Borrower Name	Holdings	Fair Value at 31 December 2024 US\$	Collateral %

Effective 19 March 2025, John McCareins resigned as a Director of the Manager of the CCF.

The recent announcement on tariffs from the new US administration has caused significant disruptions in the financial markets. Such disruptions can affect the value of the assets of the Sub-Funds and thus their performance. Management continues to monitor developments and evaluate their impact on the Sub-Funds.

There were no other significant events subsequent to the year end which would have an impact on the financial statements.

15. Approval of Financial Statements

The financial statements were approved by the Directors of the Manager on 24 April 2025.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

APPENDIX III: UNAUDITED SUPPLEMENTARY INFORMATION

For the year ended 31 December 2024

Connected Persons

Regulation 43(1) of the Central Bank UCITS Regulations requires that any transaction between the CCF and a management company or depositary to the CCF; and the delegate or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary); and any associated or group companies of such a management company, depositary, delegate or sub-delegate ("Connected Persons") is conducted at arm's length and is in the best interests of the unitholders of the CCF.

The Directors of the Manager are satisfied that: there are in place arrangements, evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Persons; and all transactions with Connected Persons that were entered into during the year complied with the obligations set out above.

Conflicts of Interest Statement

The Directors of the Manager, the Manager, the Investment Manager, the Administrator and the Depositary and their respective affiliates, officers, directors and shareholders, employees and agents (collectively the "Parties") are or may be involved in other financial, investment and professional activities which may on occasion cause a conflict of interest with the management of the CCF and/or their respective roles with respect to the CCF. These activities may include managing or advising other funds (including other collective investment schemes), purchases and sales of securities, banking and investment management services, brokerage services, valuation of unlisted securities (in circumstances in which fees payable to the entity valuing such securities may increase as the value of assets increases) and serving as directors, officers, advisers or agents of other funds or companies, including funds or companies in which the Sub-Funds may invest. In particular, other companies within the Investment Manager group may be involved in advising or managing other investment funds (including other collective investment schemes) or real estate portfolios which have similar or overlapping investment objectives to or with the Sub-Funds. Each of the Parties will use its reasonable endeavors to ensure that the performance of their respective duties will not be impaired by any such involvement they may have and that any conflicts which may arise will be resolved fairly and in the best interests of unitholders.

Remuneration Disclosures

Remuneration and Sustainable Finance Transparency

The European Union has introduced a series of legal measures (the primary one being Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088, "SFDR") requiring the Manager to provide transparency on how they integrate sustainability considerations into the investment process with respect to the financial products they manage.

Accordingly, the Manager has prepared an "Information Statement" for the purposes of meeting the disclosure requirements in Article 5 of SFDR, that is, specifically, the disclosure requirements applicable to a UCITS Management Company with regard to;

- How the Manager's Remuneration Policy is consistent with the integration of Sustainability Risk.

The Information Statement is available at [sfd-article-5-information-statement.pdf \(northerntrust.com\)](https://www.northerntrust.com/documents/funds/ntfmil-ucits-v-remuneration-disclosure-en.pdf).

The Manager has a remuneration policy in place to ensure compliance with UCITS V. The Directors primary role is to ensure that all decisions related to the funds under management are taken for the best interests of investors. The Manager pays the Independent Non-Executive Directors a fixed fee per annum. This fee is not related to the performance of the Sub-Funds.

No pension payments are made. A number of factors are included in determining the fee paid including the size and risk profile of the funds under management. The Non-Executive Directors do not receive any compensation from the Manager. Designated Persons (unless Independent Non-Executive Directors) do not receive any compensation.

The Manager sets a framework (setting out the investment objective, the investment policies, the proposed investment strategies and investment limits including leverage, liquidity and credit) that achieves a necessary level of risk control over the delegate investment manager. This framework and the ongoing controls exercised by the Manager ensure that no persons from the delegate investment manager, Northern Trust Global Investments Limited ("NTGIL") have the capacity to exercise a material impact on the risk profile of the Sub-Funds.

The Manager seeks periodic assurances from the delegate investment manager that they have an appropriate risk management focused remuneration policy in place or one that is in line with regulation which is equally effective as UCITS V, which includes, without limitation:

- (i) CRD/MiFID firms (including firms still subject to CRD III and which have availed of the CRD IV exemptions); and
- (ii) non-EU firms which are subject to group remuneration policies that is equally as effective as MiFID or CRD.

The remuneration policy is reviewed annually. Further details with regard to the remuneration policy are available at the following website: <https://www.northerntrust.com/documents/funds/ntfmil-ucits-v-remuneration-disclosure-en.pdf>.

NORTHERN TRUST UCITS COMMON CONTRACTUAL FUND

APPENDIX III: UNAUDITED SUPPLEMENTARY INFORMATION (continued)

For the year ended 31 December 2024

Quantitative Information

The delegated investment manager, has provided the following information in proportion to the activities it performs for the CCF. Remuneration of Directors of the Management Company that are also identified staff of NTGIL are included within the amounts below.

Fixed remuneration consists of base salaries and cash allowances. Variable remuneration consists of cash incentive, deferred bonus payable in short term restricted stock units (RSUs) and long term deferred incentive awards in long term cash and shares (RSUs). All material risk takers are employed by another Northern Trust Group entity.

Code staff are considered to be the identified staff of Northern Trust Fund Managers (Ireland) Limited ("NTFMIL").

Senior Management and other Code Staff	2024
Number of Code Staff	16
Fixed remuneration (US\$m)	0.39
Variable remuneration (US\$m)	0.10

Information in the previous page includes remuneration for sixteen code staff whose responsibilities cover both NTFMIL and Northern Trust Management Services (Ireland) Limited.

Information for Qualified Investors in Switzerland

The CCF, including four of its Sub-Funds*, is compliant with Swiss law for offering to all qualified investors in Switzerland. The Swiss representative is REYL & Cie Ltd, Rue du Rhône 4, CH-1204 Geneva. The Swiss paying agent is Banque Cantonale de Genève, Quai de l'Ile 17, CH-1204 Geneva. Investors in Switzerland can obtain the documents of the CCF, such as the prospectus, the memorandum and articles of association, the key information documents, and the financial reports free of charge from the Swiss representative. This document may only be issued, circulated or distributed so as not to constitute an offering to the general public (non-qualified investors) in Switzerland. Recipients of the document in Switzerland should not pass it on to anyone without first consulting their legal or other appropriate professional adviser or the Swiss representative.

*Only Northern Trust World Custom ESG Equity Index Fund, Northern Trust Developed Real Estate Index Fund, Northern Trust World ESG Leaders Equity Fund and Northern Trust World Green Transition Index Fund are compliant with Swiss law for offering to all qualified investors in Switzerland.

Each time performance data is published, it should be noted that the past performance is no indication of current or future performance, and that it does not take account of the commissions and costs incurred on the issue and redemption of units.

Net Assets Attributable to Holders of Redeemable Participating Units

The following tables detail the net assets attributable to holders of redeemable participating units in the Sub-Funds as at the year end. The net asset value per unit is calculated by determining the proportion of the net asset value of each Sub-Fund attributable to each of its unit classes and dividing this amount by the number of units of that class in issue. The number of units in issue is presented rounded to the nearest whole number. The net asset value per unit is calculated dividing the net asset value by the unrounded number of units in issue and is presented rounded to two decimal places.

APPENDIX V: SUSTAINABLE FINANCE DISCLOSURE REGULATION (“SFDR”) (UNAUDITED)

For the year ended 31 December 2024

The additional disclosure requirements under SFDR Level 2 for all annual reports published after 1 January 2024 are contained in Appendix III of this report. These disclosures were prepared using data and the analysis of such information provided by third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. The availability of such data and analysis is evolving. The presentation of information in the disclosures may also change with regulatory developments and it is in this context the information should be read and understood. The Board of the Management Company on behalf of the CCF continues to actively monitor the evolution of data provision and regulation in this regard.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust Developed Real Estate ESG Climate Index Fund

Legal entity identifier:
635400FGBYVB5USOZH43

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☒ ☐ ☐ Yes	☐ ☒ ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the ESG screening methodology;
- Exclude issuers that did not adhere to international norms such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Exclude companies that have a Global Real Estate Sustainability Benchmark ("GRESB") rating of 1 or 0 which also have a Northern Trust ESG Vector Score™ which is in the bottom decile"";
- Reduce the carbon footprint of the Product through Carbon Risk Rating metrics and reduced exposure to companies with high carbon intensity relative to the Parent Index.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

The Product may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Product would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.28%

Compliance with UNGC and international norms: 99.28%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 97.77%

Compliance with UNGC and international norms: 97.77%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.75%

Compliance with UNGC and international norms: 98.75%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 76.94% of the Product was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG screening methodology and carbon strategy. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1 and Scope 2)
- Carbon footprint
- GHG intensity
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Product's ESG Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Product's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

ESSEX PROP. TST.	FINANCIAL	1.57%	US
MITSUBISHI ESTATE CO LTD	FINANCIAL	1.40%	JP

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 99.28% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

76.94% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV as at 31/12/2024
CASH	CASH	0.04%
COMMON STOCK	COMMON STOCK	0.48%
	LODGING	0.35%
	STORAGE/WAREHOUSING	0.11%

	INVESTMENT COMPANIES	0.10%
	HOLDING COMPANIES-DIVERS	0.02%
FOREIGN CURRENCIES	FOREIGN CURRENCIES	2.22%
INDUSTRIAL	ENGINEERING&CONSTRUCTION	0.02%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

NORTHERN TRUST

ASSET MANAGEMENT

activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 76.94% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Product is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Product uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Product on an ongoing basis.

The holdings of the Product were also subject to the investment manager's hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services ("EOS") and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the ESG negative screening; the ESG Screening criteria, GRESB score, the NT ESG Vector Score™ screening and the target reduction in carbon emissions applied to the Index.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, weapons, thermal coal, unconventional oil and gas, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail.

The Product's sustainability indicators were disclosed in full as part of its in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Product is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Product's ex-post tracking error, an indication of the index Product's performance, was 0.18%. In practice, this means the Product was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Product's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust Developed Real Estate ESG Climate Index Fund B EUR Share Class	9.11 %	13.32 %
Solactive Developed Real Estate ESG Climate Index NTR	8.19 %	12.36 %

How did this financial product perform compared with the broad market index?

The Product's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust Developed Real Estate ESG Climate Index Fund B EUR Share Class	9.11 %	13.32 %
Solactive GBS Developed Markets Property Index	9.42 %	10.9 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust Europe Custom ESG Equity Index Fund

549300K9X0V6KUW2Q106

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Fund met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises, and;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies.

The sustainability indicators are disclosed in detail in the Fund's supplement as part of Annex II which can be found [here](#).

The Fund may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Fund would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.05%

Compliance with UNGC and international norms: 99.05%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

Compliance with Low Carbon Transition (LCT) Management Score based exclusion: 99.05%

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators, otherwise referred to as the NT Custom screening methodology, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.77%

Compliance with UNGC and international norms: 98.77%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.72%

Compliance with UNGC and international norms: 99.72%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.05%

Compliance with UNGC and international norms: 99.05%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.05%

Compliance with UNGC and international norms: 99.05%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1, Annex 1:

- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

The Fund was 99.05% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

62.05% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 62.05% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index, due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria was disclosed in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.17%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust Europe Custom ESG Equity Index Fund	7.99 %	16.4 %
MSCI Europe Custom ESG Index	7.67 %	15.9 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust Europe Custom ESG Equity Index Fund	7.99 %	16.4 %
MSCI Europe Index	8.59 %	15.83 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Northern Trust Europe Value ESG Fund

Legal entity identifier:
5493007Q5W6D2STQFW74

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation(EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the ESG screening criteria;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce the carbon intensity and potential emissions from fossil fuels relative to the Index.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Product.

From time to time, during the reference period, the Product may have held securities which no longer met the screening criteria owing to a change in the company's ESG profile or a corporate action. Where this was the case, such securities were identified and divested of as soon as reasonably practicable, based on the most efficient trading strategy and with careful consideration given to the impact to portfolio turnover and transaction costs.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.67%

Compliance with UNGC and international norms: 99.67%

Carbon intensity and potential carbon emissions below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Product.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 93.62%

Compliance with UNGC and international norms: 93.62%

Carbon intensity and potential carbon emissions below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.2%

Compliance with UNGC and international norms: 99.2%

Carbon intensity and potential carbon emissions below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Product.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 62.57% of the Product was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG screening criteria. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1 and Scope 2)
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Product's ESG screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Product's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 99.67% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

62.57% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 62.57% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as 'other' and no other minimum environmental or social safeguards were applied. Investments categorised as 'other' were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives for hedging and other ancillary purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The assessment of sustainability, and therefore the attainment of E/S characteristics promoted by the Product, was by way of the ESG screening criteria.

Such criteria aims to ensure that companies found not to meet the relevant expectation are screened out. The investment manager monitors compliance with this criteria through pre-and post-trade coding (where possible) in investment management systems on a continuous basis. Any post trade 'fails' flagged will result in divestment by the investment manager at the most opportune time allowing for costs and other factors.

The holdings of the Product were also subject to the investment manager's hybrid engagement approach, which combines the investment manager's own Engagement Policy, with Federated Hermes Equity Ownership Services ("EOS") and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Product does not have a specific Index designated as a reference benchmark with E/S characteristics. The Product is actively managed; therefore this section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

This section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform compared with the reference benchmark?

This section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform compared with the broad market index?

The Product's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust Europe Value ESG Fund	7.71 %	19.97 %
MSCI World Small Cap Index	8.59 %	15.83 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust High Dividend ESG World Equity Fund

Legal entity identifier:
54930057HLHIB13DY798

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
● ● ☐ Yes	● ● ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the ESG screening criteria;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce the carbon footprint of the Product relative to the Index through reduced carbon intensity and potential emissions from fossil fuels;
- Target an improvement in ESG characteristics of the Product relative to the Index, to favour companies that are more effective at managing ESG risks and opportunities.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Product.

From time to time, during the reference period, the Product may have held securities which no longer met the screening criteria owing to a change in the company's ESG profile or a corporate action. Where this was the case, such securities were identified and divested of as soon as reasonably practicable, based on the most efficient trading strategy and with careful consideration given to the impact to

portfolio turnover and transaction costs.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Sector and business activity based exclusions: 98.87%

Compliance with UNGC and international norms: 98.87%

Carbon intensity and potential carbon emissions below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were excluded.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.31%

Compliance with UNGC and international norms: 98.31%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.92%

Compliance with UNGC and international norms: 98.92%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were excluded.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 48.19% of the Product was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG screening criteria. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1 and Scope 2)
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Product's ESG Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Product's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country
NVIDIA CORP COM	TECHNOLOGY	5.80%	US

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 98.87% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

48.19% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV as at 31/12/2024

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 48.19% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as 'other' and no other minimum environmental or social safeguards were applied. Investments categorised as 'other' were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for hedging and other ancillary purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The assessment of sustainability, and therefore the attainment of E/S characteristics promoted by the Product, was by way of the ESG screening criteria.

Such criteria aims to ensure that companies found not to meet the relevant expectation are screened out. The Investment Manager monitors compliance with this criteria through pre-and post-trade coding (where possible) in investment management systems on a continuous basis. Any post trade 'fails' flagged will result in divestment by the investment manager at the most opportune time allowing for costs and other factors.

Proprietary quantitative scoring is applied by the Investment Manager incorporating the targeted significant reduction of the operational carbon intensity of the portfolio and reduced exposure to fossil fuels relative to the Index.

In addition, the Product targets a 20% improvement in the ESG characteristics of the portfolio relative to the Index, through application of exclusions and tilts aimed to improve the wider ESG characteristics of the Fund relative to the Index, including:

1. Up to 20% Increase in the portfolio weighted average MSCI ESG Intangible Value Assessment score of the portfolio; and;
2. At least 20% upweighting of exposure to ESG Leaders i.e. those with MSCI ESG ratings of AAA and AA.

The holdings of the Product were also subject to the Investment Manager's hybrid engagement approach, which combines the investment manager's own Engagement Policy, with Federated Hermes Equity Ownership Services ("EOS") and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Product does not have a specific Index designated as a reference benchmark with E/S characteristics. The Product is actively managed; therefore this section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

This section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform compared with the reference benchmark?

This section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform compared with the broad market index?

The Product's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust High Dividend ESG World Equity Fund	17.41 %	20.58 %
MSCI World Small Cap Index	18.67 %	23.79 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust North America Custom ESG Equity Index Fund

Legal entity identifier:
635400DH4IFA5NADHD78

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Fund met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises, and;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies.

The sustainability indicators are disclosed in detail in the Fund's supplement as part of Annex II which can be found [here](#).

The Fund may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Fund would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.15%

Compliance with UNGC and international norms: 99.15%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

Compliance with Low Carbon Transition (LCT) Management Score based exclusion: 99.15%

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators, otherwise referred to as the NT Custom screening methodology, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.48%

Compliance with UNGC and international norms: 99.48%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.02%

Compliance with UNGC and international norms: 99.02%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainability indicators, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.15%

Compliance with UNGC and international norms: 99.15%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainability indicators, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.15%

Compliance with UNGC and international norms: 99.15%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1, Annex 1:

- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

The Fund was 99.15% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

42.72% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV as at 31/12/2024

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 42.72% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index, due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria was disclosed in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.01%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust North America Custom ESG Equity Index Fund	24.62 %	27.19 %
MSCI North America Custom ESG Index	24.42 %	26.91 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust North America Custom ESG Equity Index Fund	24.62 %	27.19 %
MSCI North America Index	24.03 %	25.96 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust Quality Low Vol Low Carbon World Fund

Legal entity identifier:
63540012XXGEVBKBT79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☒ ☐ Yes	☐ ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the ESG screening criteria;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce operational carbon intensity and potential emissions from fossil fuel reserves (excluding metallurgical coal) relative to the Index.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Product.

From time to time, during the reference period, the Product may have held securities which no longer met the screening criteria owing to a change in the company's ESG profile or a corporate action. Where this was the case, such securities were identified and divested of as soon as reasonably practicable, based on the most efficient trading strategy and with careful consideration given to the impact to portfolio turnover and transaction costs.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.56%

Compliance with UNGC and international norms: 98.56%

Carbon intensity and potential carbon emissions from fossil fuel reserves below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Product.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 97.77%

Compliance with UNGC and international norms: 97.77%

Carbon intensity and potential carbon emissions below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.84%

Compliance with UNGC and international norms: 98.84%

Carbon intensity and potential carbon emissions below Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Product.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 47.5% of the Product was held in sustainable investments at the end of the reference period.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

NORTHERN TRUST

ASSET MANAGEMENT

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG screening criteria. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas (“GHG”) emissions (Scope 1 and Scope 2)
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Product’s ESG Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Product’s Annex II.

Lastly, adverse impacts form part of the investment manager’s focused engagement and voting activity, as well as engagement activities performed by the investment manager’s outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 98.56% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

47.5% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 47.5% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for hedging and other ancillary purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The assessment of sustainability, and therefore the attainment of E/S characteristics promoted by the Product, was by way of the ESG screening criteria.

Such criteria aims to ensure that companies found not to meet the relevant expectation are screened out. The Investment Manager monitors compliance with this criteria through pre-and post-trade coding (where possible) in investment management systems on a continuous basis. Any post trade ‘fails’ flagged will result in divestment by the Investment Manager at the most opportune time allowing for costs and other factors.

Proprietary quantitative scoring is applied by the Investment Manager incorporating the targeted significant reduction of the operational carbon intensity of the portfolio and reduced exposure to fossil fuels relative to the Index.

The holdings of the Product were also subject to the investment manager’s hybrid engagement approach, which combines the investment manager’s own Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Product does not have a specific Index designated as a reference benchmark with E/S characteristics. The Product is actively managed; therefore this section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

This section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform compared with the reference benchmark?

This section is not applicable as the Product has no ESG reference benchmark.

How did this financial product perform compared with the broad market index?

The Product's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust Quality Low Vol Low Carbon World Fund	16.92 %	14 %
MSCI World Small Cap Index	18.67 %	23.79 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust World Custom ESG Equity Index Fund

Legal entity identifier:
549300IRL7E0MYHKFS50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
● ● □ Yes	● ● ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Fund met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises, and;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies.

The sustainability indicators are disclosed in detail in the Fund's supplement as part of Annex II which can be found [here](#).

The Fund may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Fund would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.31%

Compliance with UNGC and international norms: 99.31%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

Compliance with Low Carbon Transition (LCT) Management Score based exclusion: 99.31%

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators, otherwise referred to as the NT Custom screening methodology, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.43%

Compliance with UNGC and international norms: 98.43%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.5%

Compliance with UNGC and international norms: 99.5%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.31%

Compliance with UNGC and international norms: 99.31%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.31%

Compliance with UNGC and international norms: 99.31%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1, Annex 1:

- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country
APPLE INC COM	TECHNOLOGY	5.69%	US

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

The Fund was 99.31% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

45.67% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 45.67% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index, due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, weapons, thermal coal, unconventional oil and gas, Arctic oil, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria was disclosed in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#). For more information on the methodology used for the reference Index can be found factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.03%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Custom ESG Equity Index Fund	19.18 %	24.82 %
MSCI World Custom ESG Index	18.9 %	24.47 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Custom ESG Equity Index Fund	19.18 %	24.82 %
MSCI World Index	18.67 %	23.79 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust World Custom ESG EUR Hedged
Equity Index Fund

Legal entity identifier:
549300TGA3U231WWL725

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☒ ☐ Yes ☐ ☒ No	
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Fund met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises, and;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies.

The sustainability indicators are disclosed in detail in the Fund's supplement as part of Annex II which can be found [here](#).

The Fund may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Fund would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.16%

Compliance with UNGC and international norms: 99.16%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

Compliance with Low Carbon Transition (LCT) Management Score based exclusion: 99.16%

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators, otherwise referred to as the NT Custom screening methodology, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.88%

Compliance with UNGC and international norms: 98.88%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.38%

Compliance with UNGC and international norms: 99.38%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainability indicators, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.16%

Compliance with UNGC and international norms: 99.16%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainability indicators, performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.16%

Compliance with UNGC and international norms: 99.16%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1, Annex 1:

- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

The Fund was 99.16% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

45.65% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 45.65% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index, due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, adult entertainment, gambling, weapons, thermal coal, unconventional oil and gas, Arctic oil, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria was disclosed in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.04%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Custom ESG EUR Hedged Equity Index Fund	20.45 %	22.1 %
MSCI World Custom ESG 100% Hedged to EUR Index	20.12 %	21.66 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Custom ESG EUR Hedged Equity Index Fund	20.45 %	22.1 %
MSCI World Index	26.6 %	19.6 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust World ESG Leaders Equity Index Fund

Legal entity identifier:
635400ANQDIXIFTFED38

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology ("ESG Leaders screening criteria");
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Identify companies that have demonstrated an ability to manage their ESG risks and opportunities effectively using a seven point scale from 'AAA' to 'CCC'.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

The Product may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Product would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.66%

Compliance with UNGC and international norms: 99.66%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, conventional weapons, civilian firearms, thermal coal, unconventional oil and gas, and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.43%

Compliance with UNGC and international norms: 99.43%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, thermal coal, unconventional oil and gas, and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.72%

Compliance with UNGC and international norms: 99.72%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, thermal coal, unconventional oil and gas, and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 61.53% of the Product was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG screening criteria. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Product's ESG Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Product's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country
NVIDIA CORP COM	TECHNOLOGY	9.08%	US

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 99.66% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

61.53% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 61.53% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Product is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Product uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Product on an ongoing basis.

The holdings of the Product were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the application of the ESG screening criteria designed to exclude from the Parent Index companies that do not comply with the Product's selected ESG exclusion criteria and increase exposure to companies that have demonstrated an ability to manage their ESG risks and opportunities effectively using ESG ratings.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, weapons, thermal coal, unconventional oil and gas, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Product's ESG criteria were disclosed in full as part of its in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Product is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Product's ex-post tracking error, an indication of the index Product's performance, was 0.03%. In practice, this means the Product was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Product's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World ESG Leaders Equity Index Fund	17.64 %	25.81 %
MSCI World ESG Leaders Index	17.29 %	25.4 %

How did this financial product perform compared with the broad market index?

The Product's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World ESG Leaders Equity Index Fund	17.64 %	25.81 %
MSCI World Index	18.67 %	23.79 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Northern Trust World Green Transition Index Fund

Legal entity identifier:
5493004S4TVB68XERK09

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☒ ☐ ☐ Yes	☐ ☒ ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation(EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the ESG screening methodology;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce carbon reserves and emissions versus the Parent Index, and;
- Increase exposure relative to the Parent Index to companies whose revenue is derived from products or services from 'green' sources and which have clear climate strategy.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

The Product may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Product would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.39%

Compliance with UNGC and international norms: 99.39%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.82%

Compliance with UNGC and international norms: 98.82%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.36%

Compliance with UNGC and international norms: 99.36%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 48.81% of the Product was held in sustainable investments at the end of the reference period.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG screening criteria. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas (“GHG”) emissions (Scope 1 and Scope 2)
- Carbon footprint
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Product’s ESG Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Product’s Annex II.

Lastly, adverse impacts form part of the investment manager’s focused engagement and voting activity, as well as engagement activities performed by the investment manager’s outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country
NVIDIA CORP COM	TECHNOLOGY	5.58%	US
MICROSOFT CORP	TECHNOLOGY	5.20%	US

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 99.39% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

48.81% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 48.81% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for hedging and other ancillary purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Product is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Product uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre-and post-trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Product on an ongoing basis.

The holdings of the Product were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index, due to the application of the ESG screening criteria designed to exclude from the Parent Index companies that do not comply with the Product's selected ESG exclusion criteria, and tilting to provide increased exposure to companies outside of the GICS Energy Sector with revenues derived from products or services with 'green' sources.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, weapons, thermal coal, unconventional oil and gas, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Product's ESG criteria was disclosed in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Product is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Product's ex-post tracking error, an indication of the index Product's performance, was 0.24%. In practice, this means the Product was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Product's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Green Transition Index Fund F USD Share Class	21.14 %	27.55 %
MSCI World Custom ESG Climate Series A Index	21.12 %	27.53 %

How did this financial product perform compared with the broad market index?

The Product's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Green Transition Index Fund F USD Share Class	21.14 %	27.55 %
MSCI World Index	18.67 %	23.79 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust World Natural Capital PAB Index
Fund II - A Class Hedged EUR

Legal entity identifier:
635400QJZJGHJGGRIG80

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
● ● □ Yes	● ● ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology
- Exclude issuers that did not adhere to international norms such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce the carbon emissions of the Product relative to the Parent Index, according to the standards of the EU Paris Aligned Benchmark ("PAB");
- Exclude companies according to select indicators that are associated with adverse impact on ecosystem and pollution criteria;
- Increase exposure to companies that are associated with positive contribution to the environment through their products or services; and
- Increase exposure to best-in-class companies in sectors where land use and biodiversity, resource use and emissions, effluents and waste are material topics based on their sector-relative management scores.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

The Product may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions

and other such activities. In such event, the Product would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.45%

Compliance with UNGC and international norms: 99.45%

Carbon emissions and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, ecosystem loss and water pollution, for-profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the period:

Compliance with sector and business activity based exclusions: 99.03%

Compliance with UNGC and international norms: 99.03%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, ecosystem loss and water pollution, thermal coal, unconventional oil and gas, for profit prisons, human rights, and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the period:

Compliance with sector and business activity based exclusions: 99.33%

Compliance with UNGC and international norms: 99.33%

Carbon emissions and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, ecosystem loss and water pollution, thermal coal, unconventional oil and gas, for profit prisons, human rights, and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 52.73% of the Product was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the screening methodology and carbon reduction strategy. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1, 2 and 3)
- Carbon footprint
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country
APPLE INC COM	TECHNOLOGY	5.31%	US

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 99.45% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

52.73% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product was held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 52.73% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for hedging and other ancillary purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Product is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Product uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre-and post-trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Product on an ongoing basis.

The holdings of the Product were also subject to the investment manager's hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services ("EOS") and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the application of:

- Screening criteria designed to meet the standards of the EU PAB;
- Screening criteria to reduce exposure to select indicators that are associated with adverse impact on natural resources;
- Screening criteria to increase exposure to companies that are associated with positive contribution to the environment through their products or services, or through their management of their natural capital related risks, and;
- Customised ESG screening criteria across themes including: global norms (UNGC and OECD violations), “very severe” controversies, gambling, adult entertainment, for profit prisons, tobacco, weapons, thermal coal, unconventional oil and gas, and human rights.

The Product’s sustainability indicators were disclosed in full as part in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Product’s ex-post tracking error, an indication of the index Product’s performance, was 0.14%. In practice, this means the Product was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Product’s performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Natural Capital PAB Index Fund II - A Class Hedged EUR	19.71 %	8.11 %
MSCI World Natural Capital Paris-Aligned Equity Select Index	19.38 %	8.16 %

How did this financial product perform compared with the broad market index?

The Product’s performance compared to the broad market index is detailed in the chart below:

Performance figures included for 2023 are inception to date and do not represent a full year.

	31/12/2024	31/12/2023
Northern Trust World Natural Capital PAB Index Fund II - A Class Hedged EUR	19.71 %	8.11 %
MSCI World Index	26.6 %	8.88 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust World Natural Capital Paris
Aligned Equity Index Fund

Legal entity identifier:
635400C8AZDPJRJHGZ21

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
● ● □ Yes	● ● ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology
- Exclude issuers that did not adhere to international norms such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce the carbon emissions of the Product relative to the Parent Index, according to the standards of the EU Paris Aligned Benchmark ("PAB");
- Exclude companies according to select indicators that are associated with adverse impact on ecosystem and pollution criteria;
- Increase exposure to companies that are associated with positive contribution to the environment through their products or services; and
- Increase exposure to best-in-class companies in sectors where land use and biodiversity, resource use and emissions, effluents and waste are material topics based on their sector-relative management scores.

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

The Product may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions

and other such activities. In such event, the Product would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.44%

Compliance with UNGC and international norms: 99.44%

Carbon emissions and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, ecosystem loss and water pollution, thermal coal, unconventional oil and gas, for-profit prisons, adult entertainment, alcohol, gambling, and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators, otherwise referred to as the NT Custom screening methodology, performed as expected during the period.

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index thereby only allowing investment in companies that formed part of the MSCI World Custom ESG Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, for profit prisons, ecosystem loss and water pollution, adult entertainment and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Over the period, the Product did not actively invest in any companies that did not meet the sustainability criteria set and divested of any companies that were found to no longer comply. The Product may from time to time hold equity and equity related securities which are not included in the Index constituents as a result of corporate actions and other such as activities. In such as event, the Product will sell such as securities as soon as reasonably practicable Any securities which underlying screening criteria changes in the period between rebalances to make it no longer eligible will be removed at the next index rebalance for the portfolio.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the period:

Compliance with sector and business activity based exclusions: 99.29%

Compliance with UNGC and international norms: 99.29%

Carbon emissions and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, ecosystem loss and water pollution, thermal coal, unconventional oil and gas, for-profit prisons, adult entertainment, alcohol, gambling, human rights, and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Product made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 52.97% of the Product was held in sustainable investments at the end of the reference period.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Product applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product considered principal adverse impacts (PAIs) on sustainability factors through the ESG Screening methodology and carbon reduction strategy. Specifically, the Product considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1, 2 and 3)
- Carbon footprint
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Product aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Product please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country
APPLE INC COM	TECHNOLOGY	5.31%	US
NVIDIA CORP COM	TECHNOLOGY	5.17%	US

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Product was 99.44% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the product may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

52.97% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Product held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Product's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Product made a 0% commitment to environmentally sustainable (taxonomy-aligned) investments and reports 0% actual alignment as at year-end. The Product will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas

☐ In nuclear energy

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

NORTHERN TRUST

ASSET MANAGEMENT

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Product invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Product committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Product was 52.97% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Product does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Product may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Product may have used derivatives only for hedging and other ancillary purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Product is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Product uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the Investment Manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre-and post-trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Product on an ongoing basis.

The holdings of the Product were also subject to the investment manager's hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services ("EOS") and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks
are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the application of:

- Screening criteria designed to meet the standards of the EU PAB;
- Screening criteria to reduce exposure to select indicators that are associated with adverse impact on natural resources;
- Screening criteria to increase exposure to companies that are associated with positive contribution to the environment through their products or services, or through their management of their natural capital related risks, and;
- Customised ESG screening criteria across themes including: global norms (UNGC and OECD violations), “very severe” controversies, gambling, adult entertainment, alcohol, for-profit prisons, tobacco, weapons, thermal coal, unconventional oil and gas, and human rights.

The Product’s sustainability indicators were disclosed in full as part in its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund’s ex-post tracking error, an indication of the index Fund’s performance, was 0.10%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Product’s performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Natural Capital Paris Aligned Equity Index Fund - E EUR Hedged Shareclass	19.84 %	2.44 %
MSCI World Natural Capital Paris-Aligned Equity Custom Index Hedged into Euros	19.74 %	2.56 %

How did this financial product perform compared with the broad market index?

The Product’s performance compared to the broad market index is detailed in the chart below:

Performance figures included for 2023 are inception to date and do not represent a full year.

	31/12/2024	31/12/2023
Northern Trust World Natural Capital Paris Aligned Equity Index Fund - E EUR Hedged Shareclass	19.84 %	2.44 %
MSCI World	26.6 %	0.92 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
NT Europe SDG Screened Low Carbon Index Fund

Legal entity identifier:
635400DG8Y3YDYVQLD38

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
● ● □ Yes	● ● ☒ No
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation(EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Product met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology ("SRI screening criteria");
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce the carbon footprint of the Product relative to the Parent Index through the MSCI Low Carbon Leaders Methodology;
- Increase exposure to companies, when compared with the Parent Index, that positively contribute to sustainable development goals ("SDGs");
- Identify companies that have demonstrated an ability to manage their ESG risks and opportunities effectively using a seven point scale from 'AAA' to 'CCC' ("MSCI ESG Leaders screening criteria").

The sustainability indicators are disclosed in detail in the Product's supplement as part of Annex II which can be found [here](#).

The Product may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Product would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.29%

Compliance with UNGC and international norms: 99.29%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, controversial weapons, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves, ownership, fossil fuel extraction, thermal coal power, human rights, and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.15%

Compliance with UNGC and international norms: 99.15%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index. The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, and thermal coal, unconventional oil and gas, human rights, adult entertainment, genetic modified organisms and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 98.93%

Compliance with UNGC and international norms: 98.93%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index. The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, and thermal coal, unconventional oil and gas, human rights, adult entertainment, genetic modified organisms and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Fund's sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 72.96% of the Fund was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, Funds and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1 and Scope 2)
- Carbon footprint
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Fund was 99.29% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

72.96% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
 ☐ In fossil gas
 ☐ In nuclear energy
 ☒ No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 72.96% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager's hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services ("EOS") and the efforts coming from industry initiatives. The Fund follows ISS SRI Voting Policy.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria and increase exposure to companies that have demonstrated an ability to manage their ESG risks and opportunities effectively using ESG ratings.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), "very severe", ongoing controversies, controversial weapons, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves, ownership, fossil fuel extraction, thermal coal power and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria were disclosed in full as part of its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.17%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
NT Europe SDG Screened Low Carbon Index Fund	8.52 %	18.79 %
MSCI Europe Select ESG Leaders Low Carbon Impact G Series Index	8.11 %	18.47 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
NT Europe SDG Screened Low Carbon Index Fund	8.52 %	18.79 %
MSCI Europe Index	8.59 %	15.83 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
NT World SDG Screened Low Carbon Index Fund

Legal entity identifier:
635400L3LUSCU3GXGU06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☒ ☐ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective : __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective : __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation(EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Fund met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology ("SRI screening criteria");
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies;
- Reduce the carbon footprint of the Fund relative to the Parent Index through the MSCI Low Carbon Leaders Methodology;
- Increase exposure to companies, when compared with the Parent Index, that positively contribute to sustainable development goals ("SDGs");
- Identify companies that have demonstrated an ability to manage their ESG risks and opportunities effectively using a seven point scale from 'AAA' to 'CCC' ("MSCI ESG Leaders screening criteria").

The sustainability indicators are disclosed in detail in the Fund's supplement as part of Annex II which can be found [here](#).

The Fund may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Fund would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.4%

Compliance with UNGC and international norms: 99.4%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, controversial weapons, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves, ownership, fossil fuel extraction, thermal coal power, human rights, and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.75%

Compliance with UNGC and international norms: 99.75%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index. The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, and thermal coal, unconventional oil and gas, human rights, adult entertainment, genetic modified organisms and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Products sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the period.

Compliance with sector and business activity based exclusions: 99.5%

Compliance with UNGC and international norms: 99.5%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index. The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, controversial weapons, civilian firearms, and thermal coal, unconventional oil and gas, human rights, adult entertainment, genetic modified organisms and ESG controversy scores coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail. The Fund's sustainability indicators were disclosed in full in its Supplement as part of Annex II which can be found [here](#).

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made a commitment to invest a minimum of 10% in sustainable investments in companies that positively contributed towards environmental and social objectives such as reducing exposure to fossil fuels and avoiding adverse business activities or human rights violations. 56.86% of the Fund was held in sustainable investments at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

NORTHERN TRUST

ASSET MANAGEMENT

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, Funds and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1 and Scope 2)
- Carbon footprint
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Fund was 99.4% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

56.86% of investments held in the period were determined to be in sustainable investments, none of which were taxonomy-aligned.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

NORTHERN TRUST

ASSET MANAGEMENT

energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes
- ☐ In fossil gas
- ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 56.86% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives. The Fund follows ISS SRI Voting Policy.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria and increase exposure to companies that have demonstrated an ability to manage their ESG risks and opportunities effectively using ESG ratings.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), "very severe", ongoing controversies, controversial weapons, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves, ownership, fossil fuel extraction, thermal coal power and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria were disclosed in full as part of its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.05%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
NT World SDG Screened Low Carbon Index Fund	27.93 %	27.37 %
MSCI World Select ESG Leaders Low Carbon Impact G Series Index	27.56 %	27.02 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
NT World SDG Screened Low Carbon Index Fund	27.93 %	27.37 %
MSCI World Index	26.6 %	19.6 %

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Northern Trust World Small Cap ESG Low Carbon Index Fund

Legal entity identifier:
5493004WKFJEY2MB3G60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☒ ☐ Yes ☒ ☐ No	
☐ It made sustainable investments with an environmental objective: __% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: __%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Unless otherwise stated, all data provided in the Annex IV, refers to the reference period ending 31 December 2024.

The Fund met the following environmental and social ("E/S") characteristics using the sustainability indicators to:

- Exclude issuers using revenue thresholds across a range of sectors and/or specific business activities that the investment manager deemed to have adverse impact on the environment and/or society based on the screening methodology;
- Exclude issuers that did not adhere to international norms and conventions such as UN Global Compact ("UNGC") principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises;
- Promote good governance through the exclusion of issuers directly involved in very severe, ongoing controversies and companies deemed to have unsound board composition and without a non-qualified auditor's opinion, and;
- Reduce the carbon footprint of the Fund relative to the Parent Index through reduced carbon intensity and potential emissions from fossil fuels.

The sustainability indicators are disclosed in detail in the Fund's supplement as part of Annex II which can be found [here](#).

The Fund may have from time to time held securities which were not included in the Index constituents including companies not considered to meet ESG criteria as a result of corporate actions and other such activities. In such event, the Fund would sell such securities in a reasonable amount of time taking into account the best interests of the investors.

How did the sustainability indicators perform?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.75%

Compliance with UNGC and international norms: 98.75%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, gambling, adult entertainment, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

... and compared to previous periods?

Reference period ending 31 December 2022:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.8%

Compliance with UNGC and international norms: 98.8%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2023:

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 99.42%

Compliance with UNGC and international norms: 99.42%

Carbon intensity and potential carbon emissions below Parent Index: Yes

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

Reference period ending 31 December 2024:

We expect the asset allocation number to remain broadly consistent over time.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainability indicators performed as expected during the reference period:

Compliance with sector and business activity based exclusions: 98.75%

Compliance with UNGC and international norms: 98.75%

Companies found not to meet the various exclusion focus criteria and thresholds disclosed were removed from the Parent Index.

Reduce the carbon footprint of the Fund relative to the Parent Index through reduced carbon intensity and potential emissions from fossil fuels.

The exclusion criteria was across the following high-level themes: global norms, controversies, tobacco, weapons, thermal coal, unconventional oil and gas, Arctic oil, for profit prisons and human rights coupled, in some cases, with various revenue thresholds across focused activities such as production, distribution, supply or retail.

How were the indicators for adverse impacts on sustainability factors taken into account?

The adverse indicators were taken into account by the investment manager to help form an assessment of significant harm using the mandatory Principal Adverse Impacts ("PAI") indicators in Annex 1, Table 1 of the SFDR Regulatory Technical Standards ("SFDR RTS"). Companies found to cause significant harm, per the investment manager's definition, were not deemed to be a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Fund applied the ESG controversy screening criteria methodology to identify and exclude companies that did not adhere to international norms and conventions such as:

- The OECD Guidelines for Multinational Enterprises; and,
- The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work.

The implementation of these exclusions was based on any investee company being directly involved in very severe and ongoing controversies in relation to its operations, products and services. In practice, this means that all investee companies that formed part of the Index were aligned with these minimum safeguards, not only the sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through the screening criteria. Specifically, the Fund considered the following principal adverse impact indicators as part of the investment strategy below from Table 1 Annex 1:

- Green House Gas ("GHG") emissions (Scope 1 and Scope 2)
- Carbon footprint
- GHG intensity
- Exposure to companies active in the fossil fuels sector
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

The Fund's Screening criteria also excluded issuers that did not comply across a range of sectors and/or specific activities and across range of revenue thresholds as disclosed in detail in the Fund's Annex II.

Lastly, adverse impacts form part of the investment manager's focused engagement and voting activity, as well as engagement activities performed by the investment manager's outside engagement partner, Hermes EOS. The Fund aims to encourage investee companies to improve their ESG practices and disclosures. For more information on this in relation to the Fund please refer [here](#).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2024-01-01/2024-12-31

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

The Fund was 98.75% invested in companies that promote environmental and/or social characteristics. Investments were held directly in companies (although the Fund may invest indirectly through eligible collective investment schemes) that aligned with these same characteristics.

The remaining proportion of the Fund held in cash and derivatives used for ancillary liquidity and hedging purposes. Cash and derivative investments do not form part of the Fund's environmental and social characteristics and are also not subject to any minimum safeguards.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund made a 0% commitment to environmentally sustainable (taxonomy aligned) investments and reports 0% actual alignment as at year-end. The Fund will seek to report actual taxonomy alignment when sufficient coverage and more mature and reliable data is widely available.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The Fund invested 0% of its assets in investments determined to substantially contribute to environmentally sustainable economic activities in accordance with the EU Taxonomy Regulation. Therefore 0% of its assets were invested in enabling or transitional activities.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund committed 0% of investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund was 22.03% invested in sustainable investments, none of which (0%) were aligned with the EU Taxonomy. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The Fund does not commit to sustainable investments with a social objective hence there were 0% such investments.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

Derivatives and cash were the only two investment types categorised as ‘other’ and no other minimum environmental or social safeguards were applied. Investments categorised as ‘other’ were used for the following reasons:

- Cash and cash equivalents or money market instruments: The Fund may have invested in cash and cash equivalents or money market instruments.
- Derivatives: The Fund may have used derivatives only for managing broad market exposure.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund is a passive investment strategy, using an indexation approach that aims to fully replicate the risk and return characteristics of the designated Index, including the E/S characteristics, during the reference period.

The Fund uses our preferred provider for ESG data and research and as part of the due diligence process, throughout the reference period, the investment manager will engage with the provider in relation to any data issues or updates. The exclusion methodology is coded into our investment systems pre and post trade (where applicable) to enable independent oversight so as to monitor compliance with environmental or social characteristics promoted by the Fund on an ongoing basis.

The holdings of the Fund were also subject to the investment manager’s hybrid engagement approach, which efficiently combines our own NT Engagement Policy, with Federated Hermes Equity Ownership Services (“EOS”) and the efforts coming from industry initiatives.

For details on full voting and engagement activity during the reference period, please refer to the reports found [here](#).

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index differs from the broad market index due to the application of the screening criteria designed to exclude from the Parent Index companies that do not comply with the Fund's selected ESG exclusion criteria and decrease exposure to companies with any ownership of fossil fuel reserves and reduce overall carbon intensity, when compared to the broad market index.

The exclusion criteria is across the following high-level themes: global norms (UNGC and OECD violations), very severe, ongoing controversies, tobacco, weapons, thermal coal, unconventional oil and gas, and human rights. Some exclusions are based on any tie, whilst others are based on defined revenue thresholds across activities such as production, distribution, supply or retail. The Fund's ESG criteria were disclosed in full as part of its Supplement as part of Annex II.

Further information on the impact of the exclusion criteria on the Parent Index, including the number of securities excluded from the Index, when compared to the standard benchmark, can be found in the factsheet [here](#).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

The Fund is a passive investment strategy, using an indexation approach that aims to track the risk and return characteristics of the designated reference benchmark.

The Fund's ex-post tracking error, an indication of the index Fund's performance, was 0.05%. In practice, this means the Fund was very closely aligned with the Index it was tracking over the reference period and therefore closely aligned with the E/S characteristics promoted.

How did this financial product perform compared with the reference benchmark?

The Fund's performance compared to the reference benchmark is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Small Cap ESG Low Carbon Index Fund	14.33 %	12.04 %
MSCI World Small Cap Custom ESG Low Carbon Index	14.11 %	11.86 %

How did this financial product perform compared with the broad market index?

The Fund's performance compared to the broad market index is detailed in the chart below:

	31/12/2024	31/12/2023
Northern Trust World Small Cap ESG Low Carbon Index Fund	14.33 %	12.04 %
MSCI World Small Cap Index	15.37 %	11.84 %
